

Package: veida (via r-universe)

October 5, 2026

Type Package

Title Generate AI Images with No API Key

Version 0.1.0

Description A small client for the Veida AI image generator
<<https://veida.ai>>. It uses the anonymous free tier, so the
first call works on a machine with nothing configured: 1K
output, watermarked, about seven images a day per machine.

veida_generate	<i>Generate an image from a prompt</i>
----------------	--

Description

Calls the free anonymous tier of Veida (<https://veida.ai>): 4 credits per client id, 4 per image, 30 per IP per day. Output is 1K and watermarked.

Usage

```
veida_generate(prompt, aspect_ratio = "1:1", poll_seconds = 4, timeout_seconds = 240)
```

Arguments

prompt	What to draw. Naming the light, the material and the composition moves the result far more than adding adjectives.
aspect_ratio	One of "1:1", "16:9", "9:16", "4:3", "3:4".
poll_seconds	How often the job is polled.
timeout_seconds	Deadline for the whole call.

Value

A list with url (a permanent CDN link) and watermarked. Failures signal a condition of class `veida_quota`, `veida_rejected`, `veida_timeout` or `veida_other`.

Examples

```
## Not run:  
veida_generate("matte black ceramic mug on pale oak, soft window light")  
  
## End(Not run)
```
